

Climatological Data Volume 8-11; Illinois

By National Climatic Center

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1903 Excerpt: .had not attained seasonable growth. Unfavorable weather obtained during the month of February, both temperature and precipitation being deficient, and at the end of the month the general condition of wheat was unpromising. Some fields were reported to be badly damaged and others winterkilled. Much damp, soft corn remained in hand. The characteristic of March was the heavy precipitation occurring in the southern district the latter part of the month, the measurements assuming torrential proportions at many places. At the end of the month the flood situation had become dangerous, and general inundation ensued in the lowlands. Wheat and rye showed marked improvement, and at the end of the month the outlook was generally promising. The season was backward, the soil being too wet for spring plowing. A few fields had been sown with oats, but sowing had been delayed generally on account of rains. The...

Reviews

Most of these publication is the perfect ebook accessible. It is amongst the most awesome publication i have got read through. You wont truly feel monotony at whenever you want of the time (that's what catalogs are for regarding in the event you request me).

-- **Prof. Edgar Kshlerin**

It is easy in study safer to comprehend. It can be writter in basic phrases and never confusing. It is extremely difficult to leave it before concluding, once you begin to read the book.
